

Pick a Path Math

2-Step Word Problems

Digital differentiated & self-checking math adventure story on Google Forms

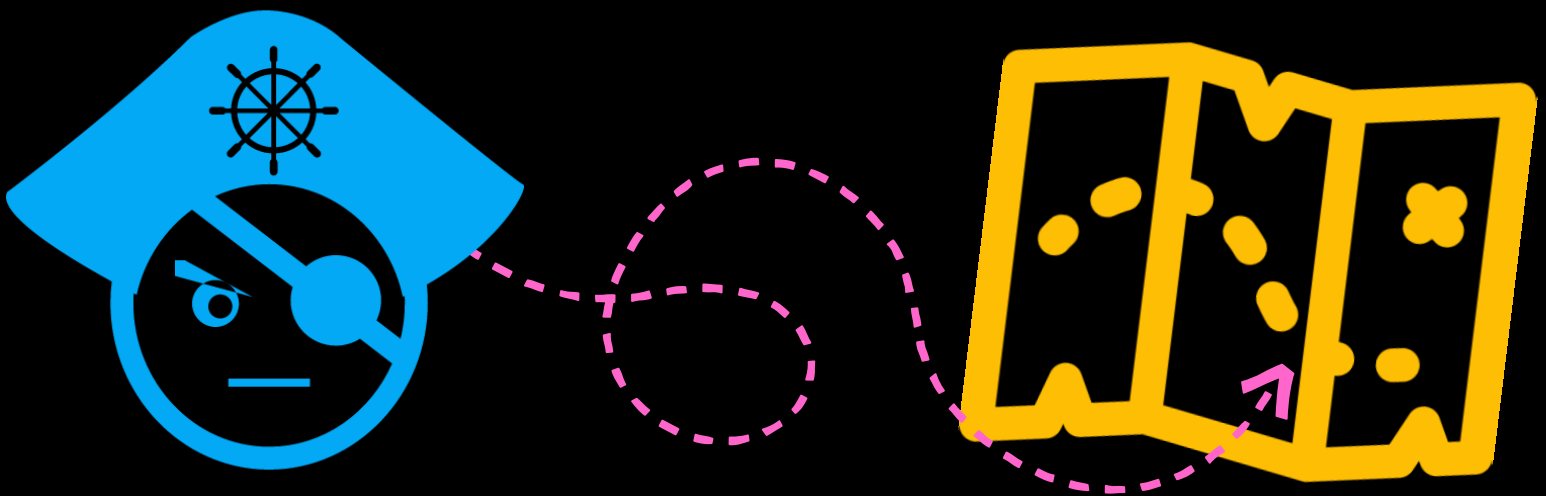

By Erin*tegration

Pick a Path Math

2-Step Word Problems

Students will determine the fate of Sammie Sealegs on the Island of Cha-Ching by solving differentiated multi-step story problems & making choices that change the adventure! Will he/she get to the treasure before the Multistep Marauders?

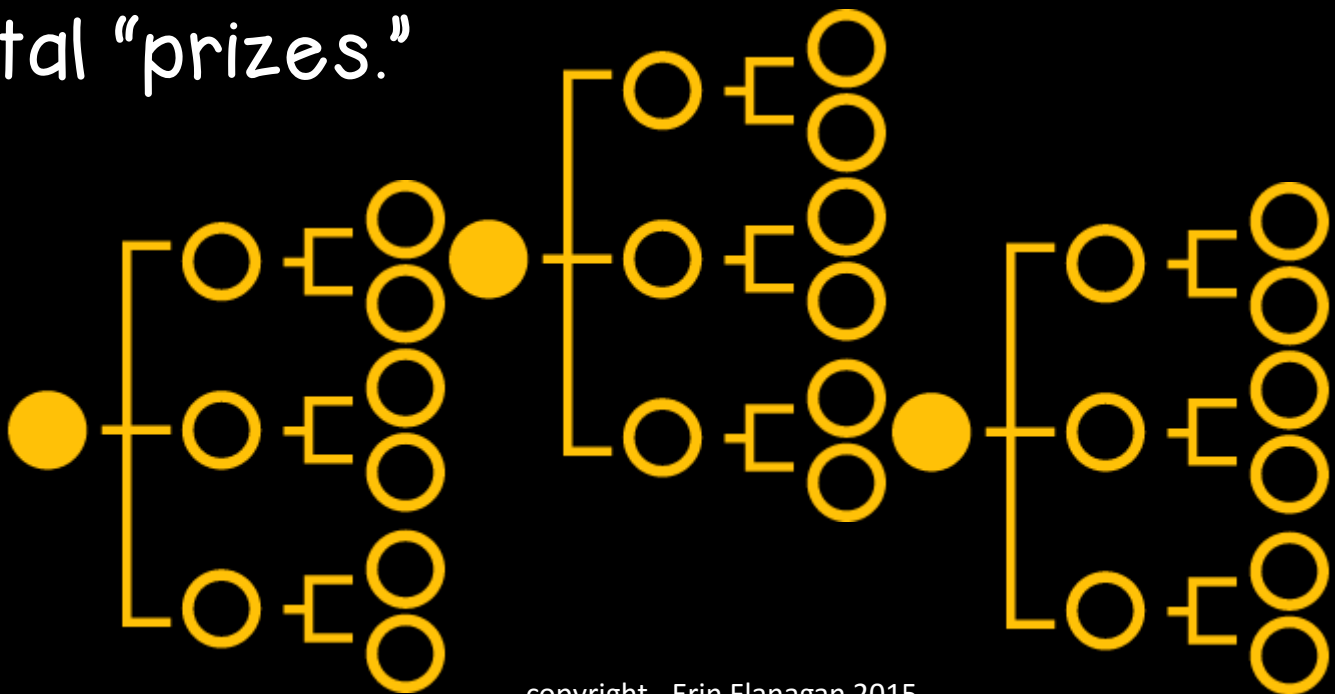

Pick a Path Math

2-Step Word Problems

In this self-checking form, only correct answers will unlock the next set of choices. With multiple paths to choose per game, students can play again & again! This story includes 42 questions, 11 possible endings, and student's choice of over 20 total "prizes."
